

Oita Eco Center is local business located in Oita-shi, Oita prefecture, found in 1999 with an objective of recycling abandoned products or industrial wastes in Oita Prefecture and also western Japan. Currently, Oita Eco Center is under Oyama Kinzoku Group which it possesses other two corporations such as Oyama Kinzoku Corporation and O-Line Corporation.

Parent corporation of Oita Eco center is Oyama Kinzoku Corporation that was established in 1973.

Currently, Oita Eco Center possesses the largest recycling platform in Oita that is equal to the size of Tokyo Dome and recycles various metal parts, used industrial machines, used tires, plastics, and other used resources. Oita Eco Center is enhancing its R&D on recycling technology and manufacturing technology to expand its areas of recycling used items and re-use these recycled products to efficiently manufacture newly reusable products.

Moreover, Oita Eco center is executing numerous CSR to improve the recycling businesses by actively investing to business school students in universities through inviting them to the factories or idea competitions. Oita Eco Center believe their CSR will stimulate young students to have an interest over recycling business and possibly find more effective way of recycling used items.
